Objective

Aspiring Full-Stack Developer with a strong foundation in HTML,CSS,JavaScript,and React.js for front-end development.Skilled in desingning and developing responsive,user-friendly web applications and building dynamic,front-end solution.

Education

Gujarat Technological University, BE in Computer Engineering	September 2022 – present
New Noble School,Naroda, HSC in Science With Maths Group	March 2021 – March 2022

Experience

MERN Stack Developer Intern At CreArt Solution Pvt. LTD.

Summer Internship | June 2025 – July 2025

- Engineered a high-performance web application using the MERN stack (React, Node.js, Express, MongoDB), implementing secure JWT-based authentication, RESTful API architecture, and reusable React components to deliver a responsive user interface with real-time data synchronization and robust form validation.

MERN Stack Developer Intern At Grownited Private LTD.

Internship | Jan 2026 – Present

- Developed and deployed high-performance web applications using the MERN stack, architecting robust RESTful APIs with Node.js and Express while managing scalable data schemas in MongoDB. Engineered dynamic, responsive user interfaces in React.js with a focus on component reusability and optimized state management to ensure a seamless user experience. Integrated industry-standard security protocols, including JWT authentication and comprehensive form validation, to streamline real-time data synchronization and secure user session management across the full development lifecycle.

Projects

Sports Arena

- The Sports Arena Booking System project highlights full-stack capabilities, including building RESTful APIs with Node.js/Express and a React.js frontend to facilitate user bookings. Key resume bullet points focus on implementing secure JWT authentication, designing responsive user interfaces, and managing data via MongoDB to optimize user scheduling and venue management. For more specific, tailored project descriptions, explore the repositories at SportsArenaBookingSystem-Frontend and SportsArenaBookingSystem-Backend.

Employee Management System

- This MERN-base Employee Management System is a full-stack web application designed for robust and efficient HR workflows.
- Built with React on the frontend and Express.js/Node.js on the backend.
- It communicate via RESTful APIs and manages data with MongoDB and Mongoose Schema modelling.
- This system reduces manual work,improves accuracy,and makes searching or updating information faster.

Technical Skills

Languages: HTML, Tailwind CSS, JavaScript

Framework/Libraries: React.js, Bootstrap, Node.js, Express.js

Database: Mongo DB
